practice-oriented project based learning in a comfortable environment, development of participants' soft skills

Educational and industrial visits:

visits to the leading Centers of Excellence and enterprises of Belarus - world leaders in production

Cultural and sports module:

acquaintance with the tourist brands of the country and Belarusian cuisine, participation in sports-hiking-water-cycling events in nature, excursions, summer entertainment programs

How do we understand education?

Education is a socially shaped process of supporting development throughout human life. Formal educational institutions are only a small part of this phenomenon. We strive to consider the universal processes that affect the field of education in its diversity, and not just the usual forms of education.

ProfiEnergy –is an acquaintance with innovations as well as accumulation of professional energy in summer for future achievements.

FOR REFERENCE:
"EcoTechnoPark - Volma" is located on the territory of the Vankovich Manor, which is a monument of the manor architecture of the XIX century. The first mention of the Vankovich dates back to 1499 (Belarusian. Vankovichy Polish. Wankowiczowie) - this is one of the oldest Belarusian noble and gentry families. The estate occupies a terrace and a floodplain of a small river Vomlyanka, included a front yard with residential buildings, outbuildings and a garden. The house is stone, two-story with a four-column portico, walls of a meter thickness. A landscape park with a small lake has been preserved. The main alley of the old manor is planted on two sides with fir, maple and ash trees. In the 19th century, carriages with the owners and guests of the Vankovich family drove along it.

Knowledge of the basic principles of operation of the Smart Home / District / City system: the operation of various sensors and the principle of their interaction with actuators, knowledge of the design of the principle of operation of a solar collector, a heat pump, photovoltaic panels, a wind generator, etc. Formation of ideas about the trends in the demand for new professional skills and the development of the labor market of the future.</p>
---------------------------------------	--

The constantly expanding network of national and international partners, highly qualified personnel, rich experience and extensive material and technical base allow us to consider RIPO as a reliable and competent strategic partner.

REFERENCE.

Why people think that Belarus is the center of Europe:

Several places claim to be the geographical center of Europe, and one of them is located in the ancient Belarusian city of Polotsk. In 2008, a memorial sign "Geographical Center of Europe" was constructed in Polotsk. Everyone who visits this place can receive a commemorative certificate, indicating that he has been in the very heart of Europe. And how many other interesting sights there are in Belarus!
